DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 27, 28, drawn to neutralizing anti-HCV antibodies that bind the HCV E2 protein.

Group II, claim(s) 12-14, drawn to methods for validating anti-HCV vaccines using the antibodies of Group I.

Group III, claim(s) 15-23, drawn to nucleic acids that encode the antibodies of Group I.

Group IV, claim(s) 24-26, drawn to methods of using the nucleic acids of Group III.

Group V, claim(s) 29, drawn to a method for the detection of anti-HCV antibodies.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: these inventions are linked by the common technical feature of anti-HCV neutralizing antibodies that bind to the HCV E2 protein. Such antibodies are disclosed in each of Burioni et al. (Virology 288: 29-35- of record in the IDS of July 22, 2004) and Habersetzer et al. (Virology 249: 32-41). Thus, there is no common special technical feature uniting the claimed inventions. Unity is therefore lacking.

Species Election

3. Art Unit: 1648

4.

5.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

If any of Groups I-IV above is elected, the Applicant is further required to elect one of the following species represented by

(A) embodiments wherein the antibody is that described in claim 2 (claims 2, 13, 16, 19, 22, 25, 27, and 28); or

(B) embodiments wherein the antibody is that described in claim 3 (claims 3, 14, 17, 20, 23, and 26-28).

4. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:
The claims drawn to the two species are indicated in the description of the species above.

1. Application/Control Number: 10/502,307

2. Page 4

3. Art Unit: 1648

4.

5.

The following claim(s) are generic: claims 1, 12, 15, 18, 21, 24, 27, and 28.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species lack unity for the same reasons as described with respect to Groups I-V above.

Examiner's Notes

6. It is noted that each of claims 12-14, and 24-26 are drawn to methods without describing any steps that are to be performed in the methods. This is not a proper claim format is U.S. Patent practice. Thus, if Groups comprising any of these claims are elected, the claims will be rejected as indefinite under 35 U.S.C. 112, second paragraph.

Conclusion

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.
